

FAMILY FÖRTMEIER EMIGRATION TIMELINE

1845 was the year that the family was together the most, with nine children all together in Germany. Then in 1846 Georg started off the emigration from Germany. Of the eleven children born, eight emigrated, as did their mother, in 1861. At that point seven of the children were living in America. In 1914, the last of the immigrant children had passed away, Louis being the last to go.
